**CORE COMPETENCIES**

*We recommend that you provide comments to support your performance during this review period. These Competencies are directly linked to Samsung Corporate values. All competencies are weighted equally for all employees. You will be rated 1 (High)-5 (Low) on each competency by your supervisor based on his/her observations of your performance during the review period.

DRIVING FOR RESULTS**Employee Comments :**

With the direction from our team and input from other teams (SEA Product Planning, Product Management, Consumer Insights, User Trial Lab., HQ R&D, Design Group, Product Planning, New Business etc.), I planned, executed, delivered strategic consumer and internal employee/friends and family user research to support and enhance the product and service strategy and product/user experience design of Galaxy S6 family, Galaxy Note 5, Galaxy Tab families including impact of storage/memory size, Samsung Pay, duplicate apps, smart switch, camera, core apps, ecosystem. Our team planned research based on the research requests from these organizations as well as our anticipation and assessments of research needs.
Example/Impact:
Examples:
1. Device Storage/Memory Size and Price Mix Research provided critical insights for consumer smartphone storage usage and competitive benchmark between price of device and memory
2. Smart Switch consumer research identified critical battery drain issues in using Smartswitch with iPhone
3. GS6 Core Apps and Homescreen Consumer Research provided evidence to the extent of negative reaction from consumers on preload non-essential apps on homescreens. The results were used extensively internally to address the issues of duplicate apps. 4. Samsung Pay Usability Trial and Beta Trial contributed to improvements of Samsung Pay product experience covering critical areas of usage.

CREATIVE INTELLIGENCE

Employee Comments :

I continually sought to improve and advance research tools and methodology to enhance effectiveness, efficiency and field validity of the results and actively sought for critique, feedback and advances in research and testing methodology, protocols, data analysis and research reports for project done, improving the quality and rigor of the entire research process.

Examples:
1) I used both in-person participatory design, 1:1 in-depth usability evaluations, focus group sessions and mass online survey to create fresh insights in duplicate apps and bloatware analysis. By employing different research strategies, we were able to identify specific apps leading to consumers' dissatisfaction and their preference for preload apps. Combined with their usage information and their homescreen layout, we gained critical insights in preload duplicate apps and made recommendations to improve our product experience by cutting the un-used non-essential apps.

2.) I used physical ergonomics evaluation, QWERTY keyboard performance evaluations, online survey and focus group sessions to identify major usability issues with Galaxy Tab S2 vs. other competitive devices including Surface 3 and iPad Air 2. We analyzed the data collected by tablets owners of different brands (Amazon Fire, MS Surface, Samsung Galaxy, Apple iPads and Other Android tablet owners) and found different demographic trends, purchase drivers and future feature preference. The results provided input for the next generation design features of our tablets (e.g., water resistance, QWERTY keyboard improvement, speaker placement etc.)

2) Duplicate Apps User Research: in the primary research with both internal employees (e.g., Apps Settings/Settings and ZTE ZMAX/Samsung Mega 2 evaluation, Nov 2014) or external consumers (e.g., Competitive wearable product experience research, May 2014)

NAVIGATING ORGANIZATIONS

Employee Comments :

1. Worked with different internal organizations in NAHQ, Mountain View and NJ Bridgewater office to facilitate Samsung Pay Closed Beta Trial. I worked closely with MNO team and Quality Assurance team in R&D at NJ Bridgewater, assistant to CEO, members of CDO, Finance and Product Management at NAHQ and the Samsung Pay Development and Quality Assurance team to make Samsung Pay Closed Beta successful.
2. I worked with vendor's user research organization as well as their senior management to support our impromptu and drastic changes in our research scope and activities. An example was the first Homescreen duplicate apps research conducted with Strategy Analytics (April - May 2015), I worked with their VP and 4 researchers from noon to midnight on a Sunday to prepare the research material to be used the next day. I also worked with Empirical senior management as well as their research team intensively in Portland in 2 research projects before running in different geographical locations so that the methodology and details can be designed appropriately with the drastic scope changes occurring before the research. Without the buyin and understanding of both the senior executives and the research teams of those companies as well as the "just-in-time" direction and detailed planning from us, it would be very difficult for them to deliver quality results.

BUILDING THE BEST TEAMS

Employee Comments :

1. Collaborated closely with Todd of our research team to divide up the consumer research into devices and services and transitioned most of the internal employee research to Soon Won's team so that we could focus on delivering the best results we can get. Leveraged with the team to get focused and strategic direction for consumer research. Provided hands-on demonstration/consultation to the team on research process and the use of various tools.

3. Our team worked with the entire Product Experience team closely to define the scope and activities for each consumer research. In-depth workshops and feedback sessions were held to define the scope and activities of the research with the team on GS6 competitive benchmark, GS6 Core apps and homescreens with different carriers, camera selfie use cases, competitive eco-systems, competitive tablets and duplicate apps.

INSPIRING OTHERS

Employee Comments :

Took initiative to provide training/consultation to internal team members as well as managers and engineers from other departments (e.g., Product Management and User Trial) on user/product research process, protocols and tools. Promoted general skills in research planning and execution for people inside and outside of group. Increased SEA employees understanding and awareness of the importance of user/product research.

Example:
1. Provided hands-on training and consultation for members within the Product Experience team (Todd Luckey, Chris and Amit) to use Qualtrics Survey platform to conduct internal employee research, especially for urgent requests from HQ (throughout 2015)
2. Provided hands-on consultation to other teams within Product Strategy and Marketing (Suzanne and Angie) to use Qualtrics Survey platform to conduct research (throughout 2015)
3. I increased the participation rate from below 40 to over 100 of Samsung Pay Closed Beta trials by physically present at Mountain View, NAHQ and NJ Bridgewater offices from early morning to early evening to persuade employees to sign up for the trial for a week. I was able to distribute all the assigned phones for those locations for Beta Trial.

ACCOMPLISHMENTS & GOALS

08528812

ACCOMPLISHMENTS

Employee Comments :

Major Projects Completed from Jan through end of October
 Consumer Research:
 1. Smartphone Storage/Memory Preference & Behavior Consumers Online Survey, N=1046
 2. Homescreen Navigation UX Preference & behavior Consumers Online Survey (N=1027)
 3. Internal Memory mix vs. Price Consumer Research Online Survey (N=1060)
 4. Smartphone Camera UX and Usage Consumer Evaluation (N=236, San Diego, New York) - (parallel research with GS6 Image Quality research from Technology Standard Team)
 5. S Pen & S Note Usability Research Consumer Evaluation (N=31, San Diego, New York)
 6. Galaxy S6 Smart Switch GS6 Smart Switch User Experience Consumer Evaluation (San Diego, New York, N=30)
 6. Fingerprint Scanner Benchmark GS5, GS6 & iPhone6 Consumer Research (N=72, San Diego, New York)
 7. Galaxy S6 Competitive Benchmark GS6, iPhone6+, iPhone6, Sony Xperia Z3, LG G Flex 2, Consumer Research (N=72, San Diego, New York)
 8. Smartphone Design and Feature Benchmark GS6, GS6 Edge, iPhone6+, iPhone6, Sony Xperia Z3, LG G Flex 2, Note 4, Note 4 Edge Consumer Research (N=102, San Diego, New York)
 9. Consumer Smartphone Smartphone and Tablet Rear Camera Usage (N=99, San Diego, New York)
 10. Consumer Smartphone Features and Services Usage - S Pen usage Mobile Payment, S Health, Core Apps usage and pain points (N=99, San Diego, New York)
 11. GS6 Core Apps and Home Screen Product Experience Consumer Research (N=102, San Francisco and Chicago)
 12. Samsung Pay Usability Trial Phase 1: Consumer Evaluation (N=113)
 13. S-Health Consumer Online Survey (N=940)
 14. S-Health UT Consumer Face-to-Face Usability Evaluation (N=38, San Francisco)
 15. Competitive Ecosystem Consumer Usability Research (N=146, Chicago, San Francisco)
 16. Competitive OOB Setup Steps and Eco-system Consumer Online Survey (N=1000)
 18. Competitive Ecosystem Consumer Online Survey (N=1000)
 19. Tablet Camera Usage Consumer Online Survey (N=1000)
 20. Delta Product Experience Consumer Online Survey (N=210, ATT and Verizon Galaxy owners)
 21. Features and Apps Naming Consumer Online Survey (N=682)
 22. Competitive Tablet Product Experience In-Person Consumer Research (N=67, Boston, Irvine)
 23. Tablet Product Experience Online Consumer Survey (N=1227, Samsung, Apple, Amazon, Surface, other brands owners and intenders)
 24. Samsung Pay Closed Beta - Focus Groups and Field Observation (n=66 Richardson, Ridgefield, Bridgewater, Mountain View)
 25. Samsung Pay Closed Beta - Field Study (n=325)
 26. Samsung Pay Closed Beta Final Consolidated Report
 27. Samsung Pay Open Beta (n=2,642)
 28. Duplicate Apps Focus Group Sessions Report FINAL_11_6_2015 (N=56)
 29. Duplicate Apps Focus In-Person Usability and Usage Evaluation Critical Brief (N=30)
 Internal Employee Research:
 16 different internal employee research (details available on request as documentation of those research will exceed the field entry word limit)

AREAS OF IMPROVEMENT

Employee Comments :

1. Devise a better asset tracking system for company assets used in user testing, especially for consumer testing.
 2. Continue to simplify complex research insights/results and design engaging presentation for effective executive consumption.
 2. Continue to work within the team to further focus research activities on their needs.
 3. Develop detailed recommendations and measurable criteria of product improvements based on consumer product experience research and business needs.
 4. Advocate consumer experience from user/product research as basis for innovative, strategic, socially responsible and differentiable features development.
 5. Continue to mentor, train and develop awareness, skills and knowledge of product/user research in the team as well as Samsung employees outside the team.

FUTURE GOALS**Employee Comments :**

1. Become a world-class user and product research expert with both top-notch quantitative and qualitative skills
2. Continue to enhance research methodology and analysis framework and provide valid and insightful results for the company to innovate and improve our products and services to be #1 in the marketplace
3. Advocate professional integrity and ethics as a researcher and scientist
4. Train and mentor team and employees on the basic understanding and importance of product experience.
