DRIVING FOR RESULTS

2.0

Employee Comments :

In the Multi-Device Experience research (a joint project across different organizations from HQ and SEA), a consumer online survey was launched to capture user behavior of connecting their premium smartphones/tablets to TV, their ownership and usage of various CE devices (including streaming media devices, AI speakers, TV/Home entertainment remote controls), Cloud services usage etc. Upon additional request from HQ CMI team, I had to launch an additional survey capturing iPhone owners aged 17 to 35 as there were not enough respondents in that segment. In the course of adapting the original survey to the second one, I accidentally changed the options of a critical question. As a result, the Samsung and Android smartphone ownership data were lost. The second survey was completed on 8/9/2017 and I immediately took action to address the problem and spent the rest of that week including Saturday and Sunday to reconstruct the lost data from the initial report and merging the 2 datasets together. As a result of my methodical and patient reconstruction with stringent verification of the data collected, I was able to recover the lost data and delivered the merged results to the Ecosystem team under Chris Martinez on 8/14/2017 for them to work on the detailed report. I also supported the team by providing customized datacuts throughout the process for the report they generated and shared eventually for the various teams within Samsung.

Evaluator Comments :

Sang has been a great team player in my team and delivered multiple researches both from internal SEA as well as HQ's

CREATIVE INTELLIGENCE Employee Comments : In the Tablet Form Factor and Display Aspect Ratio Consumer Research project (report dated 09/01/2017), I have identified additional tablet sizes and aspect ratios that were outside the scope that HQ Product Planning wanted to validate. Working with the Mobile Computing Product team, I designed and implemented a research methodology that could isolate the focused area that HQ wanted explicitly to test and additional areas that SEA thought to be critical to know. As a result, we identified that the current physical design and display aspect ratio (10.5" 16:10) was perceived by consumers as too long, unbalanced and awkward to use even after better interactive experience (blinded) with actual apps. Using the evidence-driven user research approach I designed and executed, both short-term and long-term recommendations were proposed to address the shortcomings of the current HQ designs of Tab S4. In essence the short term recommendation was to use live demo tablets in retail environment as consumers preferred the interactive experience of 16:10 tablets. The longer term recommendation is launch a premium versatile tablet with a larger display (e.g., 11" 4:3 display at \$699) based on both the average purchase budget and the preference from consumers. Evaluator Comments : Good researches done with multiple teams, and would like to see more creativeness in terms of methodology as well as different aspect of approach to drive multiple angles in 2018.	3.0
NAVIGATING ORGANIZATIONS Employee Comments : I have proactively worked with different organizations as well as within the IoT, Ecosystem and Product Research team for the procedures, analysis and documentation required to submit PUMI and get funding support from Finance for user/consumer research in 2018. These include processes and documentation required to initiate renewal of Qualtrics Online Survey Platform which are critical to not only our research process but also to various teams including Hand Held Phones Product Marketing, Mobile Computing Product Marketing, Strategic Analysis (Big Data), Product Innovation/Advanced Concepts. I also held meetings within the IoT, Ecosystem and Product Research team to get their input and feedback for 2018 projects and an example ROI analysis. With those preparation, I met with our financial analyst to actively seek for his feedback and direction for product/consumer research in 2018. I also hosted a meeting with Qualtrics and our financial analyst so that he fully understood the capabilities and importance of the platform. With his understanding and guidance, we are now preparing for the PUMI to renew Qualtrics license with additional modules (Conjoint Analysis and Stat IQ) for 2018. Despite the stringent scrutiny and aggressive cut of operating expense for 2018, it is anticipated that the platform renewal will not encounter major issues. Renewal PUMI is scheduled to be submitted before middle of November. Evaluator Comments :	3.0

BUILDING THE BEST TEAMS Employee Comments : I have proactively trained, provided consultation and advice to the 2 contractors hired through HQ Usability team and worked under Chris Martinez team as usability researchers to conduct professional usability research. I also provided training of using Qualtrics as online survey and user trial platforms to both contractors as well as Chris Martinez team members so that they can effectively and efficiently use the survey tool to design, conduct and analyze results. I also provided hands-on training for the contractors in user research methodology as well as different types of metrics used in user research including SUS, Likert scales, Osgood's semantic differential, Emotional Rating PANAS-X, Service Personal Value Analysis (Serpval) and Perceived Usefulness scale. All of those are established measurement scales used in the industry. The training enables the contractors to be highly capable user researchers. Evaluator Comments :	3.0
INSPIRING OTHERS Employee Comments : I have been assisting and consulting different teams in their product or user experience research projects and received support from different stakeholders from different teams in conducting RFP and making vendor recommendations, designing research methodology, engaging detailed research planning and overseeing the user/product research execution on their behalf. In almost all cases, the funding for those research projects were acquired and secured by the diverse number of teams including HQ Product Planning, SEA Mobile Computing, SEA Product Marketing, HQ Usability team. Another recent example is from an unsolicited request from product launch operations team to plan and conduct packaging research for premium flagship device in Q1 2018. I provided an overview of the packaging research methodology and sample research reports. Evaluator Comments :	3.0

ACCOMPLISHMENTS & GOALS (Comments Optional)

ACCOMPLISHMENTS

Employee Comments :

1.) Led team and completed Dream UX pre-launch Internal Experts Evaluation (with 7 iterative UX reviews and 2 internal employee UX research resulting in 45 UX improvements of USP features for Galaxy S8 and S8+
2.) Completed HQ requested research of the following topics using internal employees - Bixby Button, Wireless Charger LED, AR Stickers, Selfie AR effects, Download AR stickers
3.) Monitored and released Industry Competitive briefs on Smartphones, IoT and Ecosystem to the team
4.) Completed Multi-Device Experience Consumer Surveys, Protective Case Preference for Galaxy premium smartphones consumer survey, Competitive premium smartphones and GS8/GS8+ substitutability Consumer survey, Harmon and competitive brands awareness consumer survey, Results of surveys were heavily used by our team and PSM Product Marketing to understand consumer behavior and planning of future products (for example, the GS8/GS8+ substitutability results have been used to recommend future mix to optimize profit)
5.) Completed 2 large-scale face-to-face consumer product experience research for PSM Mobile Computing. Results were used by Mobile Computing team to inform product experience gaps and to recommend improvements and future direction to HQ Product teams. :
a.) 2-in-1, tablets and gaming laptops competitive product experience benchmark including physical design, ergonomics, specifications, audio, display and QWERTY keyboard performance.
b.) Galaxy Tablet form factor and aspect ratios consumer experience and product concepts evaluations

Evaluator Comments :

AREAS OF IMPROVEMENT

Employee Comments :

1.) Become a Qualtrics Research Core expert by attending the certification course of their Research Core Expert training
2.) Continue to train different teams across departments in different types of research projects for a high-performance proactive research practices
3.) Work with various teams to formalize user/product research ROI analysis so that funding can be secured more easily

Evaluator Comments :

FUTURE GOALS

Employee Comments :

1.) Become a world-class user and product research expert with both top-notch quantitative and qualitative skills
2.) Continue to enhance research methodology and analysis framework and provide valid and insightful results for the company to innovate and improve our products and services to be #1 in the marketplace
3.) Advocate professional integrity and ethics as a researcher and scientist
4.) Train and mentor different teams on the basic understanding and importance of product experience research practice as needed
